AI in our daily life

Image and Facial Recognition

AI-based image recognition systems, like those used in Bing lens and Facebook, can identify objects, landmarks, and faces in photos.

Introducing ChatGPT

- ChatGPT is an advanced language model developed by OpenAI, trained to engage in conversational interactions just like a human.
- Ask anything you want, and ChatGPT will be happy to chat with you.

How ChatGPT works:

- ChatGPT uses a big brain called GPT (Generative Pre-trained Transformer) to understand what you say and answer back.
- It learns a lot from the data fed into it to become smarter every day.
